The closest like-for-like alternative is the Crockpot Digital Slow Cooker 3.5L [CSC113]. It matches the Morphy Richards on capacity, so it's ideal for 3–4 people and won't hog too much worktop space in a typical UK kitchen. What's better: the programmable countdown timer makes it more convenient if you want dinner to finish at a set time, and the UK 3-pin plug means it's ready to go straight out of the box. What's worse: it doesn't have the sear-and-stew style appeal of a removable hob-friendly pot, so you'll usually need a separate pan for browning meat. Choose this if you want the same size but prefer set-and-forget digital control.

The Morphy Richards 6.5L Easy Time Slow Cooker is the obvious step up if you batch cook, feed a family, or like leftovers for lunches. Compared with the 3.5L model, it offers much more capacity, automatic heat settings, keep warm mode and a countdown indicator, so it feels more premium and practical for larger portions. What's better: bigger pot, more flexibility, and a hob-proof pot that adds versatility. What's worse: it takes up more cupboard and worktop space, and the £58 price is a noticeable jump. Pick this if you regularly cook for 4–6 people or want to make big chilli, pulled pork or soup batches.

The Crockpot Lift and Serve Digital Slow Cooker 4.7L [CSC052] sits nicely between compact and family-sized. Compared with the Morphy Richards 3.5L, it gives you more room for stews, curries and joints of meat, plus a hinged lid and programmable countdown timer for easier serving and timing. What's better: the extra capacity and Lift and Serve design make it more versatile for Sunday roasts or entertaining. What's worse: it costs more, and the larger footprint may feel a bit hefty on smaller UK worktops. This is the one to choose if you want a mid-size slow cooker that's a little more future-proof.

If you’re mainly after a premium rice cooker rather than a slow cooker, the Yum Asia Sakura is a very different but high-quality alternative. It’s not a direct replacement for the Morphy Richards, but it does a brilliant job for rice, grains and one-pot meals thanks to ceramic bowl construction and fuzzy logic cooking. What’s better: more cooking programmes and a more advanced, precise experience. What’s worse: it’s far more expensive and not the right tool for classic slow-cooker stews, especially if you want searing and slow braising in one pot. Choose it only if rice is a weekly staple and you want a multi-function countertop cooker.

The Ooni Fyra 12 is the wildcard option: brilliant, but only if you’re not actually looking for a slow cooker. It’s an outdoor wood-pellet pizza oven, so it completely outclasses the Morphy Richards for pizza nights, but it needs outdoor space and is far less practical for everyday casseroles. What’s better: restaurant-style pizza and outdoor cooking fun. What’s worse: huge price, no slow-cooking ability, and it’s not suited to a small UK kitchen. Buy this if your real goal is outdoor entertaining rather than weekday stew duty.

Still Buy the Original If...

The original Morphy Richards 3.5L is still a great choice if you want a compact, attractive slow cooker with sear-and-stew convenience and a size that suits 2–4 people. It’s especially appealing if you like the matte black and rose gold finish and want something simple, tidy and easy to clean.
